Fund performance

Fund information

Investment in mutual funds **is not** a money deposit.

## What are you investing in?

### • Investment Policy

- Minimum 80% of NAV in average of fund accounting year are invested in the master fund named, JPMorgan Japan (Yen) Fund, Class (acc) – JPY (ISIN Code:HK0000055670).
- The investment policy of the Master Fund is to provide long-term capital growth through investment primarily in Japanese securities and other securities whose performance is linked to that of the Japanese economy. Further information you may visit [www.jpmorganassetmanagement.com](http://www.jpmorganassetmanagement.com)
- The Management Company reserves the right to change the type and feature of the Fund to a “fund of funds” or making direct investments in foreign instruments and/or securities or to revert to “feeder fund” in the future without increasing the risk spectrum of the Fund. In this respect, the change shall be made at the Fund Manager’s discretion according to market situation by taking into consideration the utmost benefits of the unitholders.

### • Management Style

- The fund aims to track investment return of the master fund (passive management).
- The master fund aims to generate higher return than the benchmark (active management).

## Who is the fund suitable for?

- Investors who can accept fluctuation of prices of stocks, which may increase or decrease to the level below the initial investment, resulting in a loss.
- Investors who prefer medium to long term investment in anticipation of better return in long term than investment in fixed-income instruments.

## This fund **is not suitable for:**

Investors who prefer fixed rate of return or preserve full amount of principal.

**For further clarification on this investment policy and potential risks, what should you do?**

- **Read** the full prospectus or **seek** advice from the management company or its appointed selling agents.

**Unless you have full grasp in the nature of risks, it is advisable you should refrain from investment in this fund.**

# What are the key risks of the Fund?

## • Important Risk Warnings

- This fund invests in offshore equities that contain the market risks in association with economy, politics or society. Such market risks can affect business to the extent that change the market condition and consequently affect stock prices.
- The fund may invest in forward contract to enhance portfolio efficiency and may invest in structured note. This may contain higher risks than investing directly in underlying securities.
- This mutual fund's investment is highly concentrated in Japan and therefore investors should consider diversify the risks in their portfolio.
- Investors should study information on investment in RMF and find more information at full prospectus or tax guideline.
- Investors may not pledge, transfer, dispose of or use the units as collateral.

**Risk Spectrum of the Fund**

## Key Risks

### 1. Market risk

  - 95th Percentile (Bottom 5% performance)
4. Fund returns are annualized for periods longer than one year.

## Detailed Explanation of Disclosures in the Prospectus

The information disclosed below is a summary of risk dimensions.

Topic	Disclosure																								
1	<p><b>Market Risk</b></p> <p>Market risk is the risk relating to fluctuation in value of securities, the loss of which is due to the factors that affect an entire market or asset class. Market risk has different effect on different type of funds as follows:</p> <table border="1" data-bbox="416 405 1533 544"> <tr> <td colspan="8">Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.</td> </tr> <tr> <td></td> <td>Low</td> <td></td> <td></td> <td></td> <td></td> <td></td> <td>High</td> </tr> <tr> <td>SD</td> <td></td> <td>&lt; 5%</td> <td>5-10%</td> <td>10-15%</td> <td>15-25%</td> <td>&gt; 25%</td> <td></td> </tr> </table> <p><b>Mutual Fund</b> is generally exposed to the market risk when the value of the securities in which the fund deviates (increase or decrease) as a result of external factors such as economic conditions, investment climate, political factors in the issuer’s country or other country. The market risk is expressed in terms of standard deviation (SD) – the higher the SD, the higher the market risk (due to changes in securities prices).</p>	Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.									Low						High	SD		< 5%	5-10%	10-15%	15-25%	> 25%	
Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.																									
	Low						High																		
SD		< 5%	5-10%	10-15%	15-25%	> 25%																			
2	<p><b>Currency Risk</b></p> <p><b>Currency Risk</b> is the possibility that changes in exchange rate will affect the value of investment units. For example, if a mutual fund invests in securities denominated in US Dollar during Thai Baht depreciation and the units are subsequently sold when Thai Baht appreciates, the mutual fund will receive lower return in Thai Baht. On the other hand, if the same fund invests in securities denominated in US Dollar during Thai Baht appreciation and the units are subsequently sold when Thai Baht depreciates, the mutual fund will receive higher return in Thai Baht. Therefore, currency hedging techniques as follows are key tools to manage such risk.</p> <table border="1" data-bbox="416 1048 1533 1283"> <tr> <td colspan="7">Currency risk is assessed based on the exchange rate hedging policy of the fund.</td> </tr> <tr> <td></td> <td>Low</td> <td></td> <td></td> <td></td> <td></td> <td>High</td> </tr> <tr> <td>FX hedging</td> <td></td> <td>Fully / Almost fully hedged</td> <td>Partially</td> <td>At discretion</td> <td>No hedging</td> <td></td> </tr> </table> <ul style="list-style-type: none"> <li>• <b>Fully / Almost fully hedged:</b> Investors have no exposure to currency risk.</li> <li>• <b>Partially-hedged with fixed ratio:</b> Investors may be exposed to certain level of currency risk.</li> <li>• <b>Hedging at discretion of the fund manager:</b> Investors may be exposed to currency risk because it is the discretion of the fund manager whether to use a currency hedging technique.</li> <li>• <b>No hedging:</b> Investors are exposed to currency risk.</li> </ul>	Currency risk is assessed based on the exchange rate hedging policy of the fund.								Low					High	FX hedging		Fully / Almost fully hedged	Partially	At discretion	No hedging
