Fund performance

Fund information

Investment in mutual funds **is not** a money deposit.

Subscription and/or Switching-in from Non-LTF funds are not allowed from 2 Jan 2020 onwards

What are you investing in?

- **Investment Policy**

- Minimum 80% of its NAV in average in each fiscal year are invested in small and medium-sized companies listed in the SET and/or MAI with strong fundamental, high business growth potential. Small and medium-sized companies defined for this fund are the companies that are listed in SET or MAI with the market capitalization of no more than 80,000 million Baht as at the date of investment by the fund.
- The remaining fund assets are invested in fixed income, money markets etc.

- **Management Style**

Aim for better returns over the fund's benchmark (Active Management)

Who is the fund suitable for?

- Investors who can accept fluctuation of prices of fixed income instruments and stocks, which may increase or decrease to the level below the initial investment, resulting in a loss.
- Investors who prefer medium to long term investment in anticipation of better return in long term than investment in fixed income instruments.

This fund **is not suitable for:**

Investors who prefer fixed rate of return or preserve full amount of principal.

For further clarification on this investment policy and potential risks, what should you do?

- **Read** the full prospectus or **seek** advice from the management company or its appointed selling agents.

Unless you have full grasp in the nature of risks, it is advisable you should refrain from investment in this fund.

What are the key risks of the Fund?

• Important Risk Warnings

- This fund invests in equities that contain the market risks in association with economy, politics or society. Such market risks can affect business to the extent that change the market condition and consequently affect stock prices.
- Investment units of LTF invested before 1 January 2020 can not be transferred, pledged or used as collateral.
- In the case where there is a tendency that more than two-thirds of the total mutual fund units sold are to be redeemed, the Management Company may dissolve the fund at its discretion and may cancel the redemption orders it has already received or stop accepting such orders.

Risk Spectrum of the Fund

Key Risks

 - 75th Percentile (Bottom 25% performance)
 - 95th Percentile (Bottom 5% performance)

Detailed Explanation of Disclosures in the Prospectus

The information disclosed below is a summary of risk dimensions.

	Topic	Disclosure																																																
1	Market Risk	<p>Market risk is the risk relating to fluctuation in value of securities, the loss of which is due to the factors that affect an entire market or asset class. Market risk has different effect on different type of funds as follows:</p> <table border="1" data-bbox="416 371 1536 510"> <tr> <td colspan="8">Equity Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.</td> </tr> <tr> <td></td> <td colspan="6">Low</td> <td>High</td> </tr> <tr> <td>SD</td> <td>< 5%</td> <td>5-10%</td> <td>10-15%</td> <td>15-25%</td> <td>> 25%</td> <td></td> <td></td> </tr> </table> <p>Equity Fund is generally exposed to the market risk when the value of the securities in which the fund deviates (increase or decrease) as a result of external factors such as economic conditions, investment climate, political factors in the issuer’s country or other country. The market risk in equity fund is expressed in terms of standard deviation (SD) – the higher the SD, the higher the market risk (due to changes in securities prices).</p> <p>The market risk of domestic equities can be determined from the type of stocks in which the fund invests.</p> <table border="1" data-bbox="416 808 1536 1014"> <tr> <td colspan="8">Domestic equities – The market risk can be determined from the type of stocks in which the fund invests (approximately 80% of NAV).</td> </tr> <tr> <td></td> <td colspan="6">Low</td> <td>High</td> </tr> <tr> <td>Type of stocks</td> <td>General</td> <td>Large Cap</td> <td>Mid/small</td> <td>Sector</td> <td></td> <td></td> <td></td> </tr> </table>	Equity Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.									Low						High	SD	< 5%	5-10%	10-15%	15-25%	> 25%			Domestic equities – The market risk can be determined from the type of stocks in which the fund invests (approximately 80% of NAV).									Low						High	Type of stocks	General	Large Cap	Mid/small	Sector			
Equity Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.																																																		
	Low						High																																											
SD	< 5%	5-10%	10-15%	15-25%	> 25%																																													
Domestic equities – The market risk can be determined from the type of stocks in which the fund invests (approximately 80% of NAV).																																																		
	Low						High																																											
Type of stocks	General	Large Cap	Mid/small	Sector																																														
2	High Concentration Risk - High Issuer Concentration Risk - High Sector Concentration risk - High Country Concentration risk	<table border="1" data-bbox="416 1081 1536 1167"> <tr> <td></td> <td colspan="3">Low Risk</td> <td colspan="2">High Risk</td> </tr> <tr> <td>Issuer concentration risk</td> <td>≤ 10%</td> <td>10-20%</td> <td>20-50%</td> <td>50-80%</td> <td>> 80%</td> </tr> </table> <p>This risk comes from investing more than 10% of the fund’s NAV in one issuer, party, or other person who has obligations under the instruments or the contracts. Concentration risk does not include investment in the following assets: Thai government bonds; Investment-grade foreign government bonds; and Investment-grade deposits or cash-equivalent instruments of a depository or an issuer.</p> <table border="1" data-bbox="416 1559 1536 1644"> <tr> <td></td> <td colspan="3">Low Risk</td> <td colspan="2">High Risk</td> </tr> <tr> <td>Sector concentration risk</td> <td>≤ 20%</td> <td>20-50%</td> <td>50-80%</td> <td>> 80%</td> <td></td> </tr> </table> <p>Remark: This fund has concentration investment in...</p> <p>This risk comes from the Fund investing in a single or further sector more than 20% of the total NAV. In the criteria which’s not include investment in Thai or foreign government bonds or cash-equivalents of a depository.</p> <table border="1" data-bbox="416 1839 1536 1924"> <tr> <td></td> <td colspan="3">Low Risk</td> <td colspan="2">High Risk</td> </tr> <tr> <td>Country concentration risk</td> <td>≤ 20%</td> <td>20-50%</td> <td>50-80%</td> <td>> 80%</td> <td></td> </tr> </table> <p>Remark: This fund has concentration investment in...</p> <p>This risk comes from the Fund investing in a single or further country more than 20% of the total NAV.</p>		Low Risk			High Risk		Issuer concentration risk	≤ 10%	10-20%	20-50%	50-80%	> 80%		Low Risk			High Risk		Sector concentration risk	≤ 20%	20-50%	50-80%	> 80%			Low Risk			High Risk		Country concentration risk	≤ 20%	20-50%	50-80%	> 80%

	Low Risk			High Risk																																														
Country concentration risk	≤ 20%	20-50%	50-80%	> 80%																																														

	Topic	Disclosure
3	Maximum Drawdown	<p>Maximum drawdown means an accumulated loss as a result of the investment in the past five years from the reporting date (or since inception if the fund has been established for less than five years). It is calculated as follows:</p> $\text{Drawdown}_{(t)} = \frac{\text{Unit value}_{(t)} - \text{Highest unit value}^*}{\text{Highest unit value}^*}$ $\text{Maximum Drawdown} = \min (\text{Drawdown}(t))$ <p>Remark: * Highest unit value means the highest value of unit in the preceding period up to the calculation date (t).</p>
4	Standard Deviation	<p>Standard Deviation (SD) of Fund measures the volatility the fund's returns, using the calculation as prescribed by Association of Investment Management Companies re: Standard for Measurement and Presentation of Performance of the Mutual Funds. SD expresses the historical performance in annual percentage for the five years preceding the reporting date.</p>
5	Tracking Error	<p>Tracking Error (TE) is the difference between a mutual fund portfolio's returns and the benchmark index it was designed to copy. This indicates how well the mutual fund is performing against the benchmark index and shows how much the mutual fund deviates from the benchmark index. For example, if the mutual has a low TE, this means the fund has slightly deviated from the benchmark index and therefore the fund is efficient in copying the benchmark index. On the other hand, if the mutual has a high TE, this means the fund has substantially deviated from the benchmark index and therefore it is unlikely that the fund will achieve return at similar rate to the benchmark index.</p> <p>TE is used for tracking error of passive funds/ index tracking such as index fund or ETF.</p>
6	Portfolio Turnover Ratio	<p>Portfolio Turnover Ratio (PTR) is the percentage of a mutual fund or other investment's holdings that have been replaced in a given year which can better reflect the investment strategies employed by the fund manager. It is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over the past 12-month period, divided by the total net asset value (NAV) of the fund of the same period.</p> $\text{PTR} = \frac{\text{Min (Subscription, Redemption)}}{\text{Average NAV}}$
