Distribution policy	Accumulating
Fund domicile	Luxembourg
ISIN	LU1692117366
Benchmark	MSCI World (NR)

Investment Policy

This sector-based equity fund invests along the value chain of the global infrastructure opportunity set. The investment universe encompasses companies that provide the facilities and services necessary to maintain and develop modern infrastructure, and also includes companies supplying infrastructure-related products and services. The objective is to maximize total return from capital appreciation and dividends over extended periods of time. It follows an unconstrained, non-benchmark oriented approach to identify attractively valued companies positioned to benefit from the infrastructure theme.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Morningstar rating ★★★★★
(30.04.2024)

Performance overview - monthly & cumulative

since 01.01.2024

Performance overview - cumulative

since 01.06.2014

Until **14.12.2017**, the Fund had different characteristics and performance was achieved under circumstances that no longer apply. Repositioning as per 14.12.2017 (Old Fund name: CSIF 2 – CS (Lux) Infrastructure Equity Fund).

Performance overview - monthly & YTD

since 01.01.2024, in %

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- **Liquidity risk:** Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- **Counterparty risk:** Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default.
- **Operational risk:** Deficient processes, technical failures or catastrophic events may cause losses.
- **Political and Legal risks:** Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- **Sustainability risks:** Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount. The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only. The full offering documentation including complete information on risks may be obtained free of charge from a UBS client advisor, representative, or, where applicable, via Fundsearch ([credit-suisse.com/fundsearch](https://www.ubs.com/fundsearch)).

² The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance commentary

The fund performed in line with the broader equity market as measured by the MSCI World (NR) Index (source: Aladdin, gross fees in USD). The largest contributor to the fund's monthly performance was Spanish airport operator Aena, which is interested in acquiring Ferrovial's UK airport portfolio; followed by Veolia, which benefited from a good waste performance and a strong order intake at Water Tech in the first quarter of 2024; and French renewable energy producer Neoen, which was triggered by a takeover bid received from Brookfield. US midstream stocks Kinder Morgan and Williams performed well on the continued constructive guidance for liquefied natural gas (LNG) demand and Permian supply growth. Conversely, National Grid shares were hit hard following the announcement of an unexpectedly large rights issue to fund upwardly revised network expansion plans. Westshore Terminals was sold after weak Q1 results and Republic Services (waste) was sold despite solid results that were below guidance. Union Pacific lost ground as some segments, mainly in coal shipment, remain difficult.

Market comments

Global equity markets performed strongly in May as confidence grew that the US economy was heading for a soft landing, while tech companies continued to ramp up investments in artificial intelligence. Market sentiment was also boosted by strong first-quarter earnings and signs that the rate-cutting cycle is gaining momentum. Infrastructure stocks underperformed the broader equity market (source: Bloomberg, NMX Infrastructure Composite Index, MSCI World [NR] Index) during this period. Among the various sub-themes, renewables, electric utilities, multi-utilities, toll roads, and towers performed best. Conversely, waste management companies, and railroads were found at the bottom of the ranking. Renewable energy and utilities in particular benefited from the slight decline in US bond yields, while US transportation stocks were negatively impacted by the weaker economic growth guidance.

Comments on transactions

In May 2024, we decreased the weighting of the transportation infrastructure, oil and gas storage, and transportation sectors mainly in favor of electric utilities and renewables. In renewables we bought EDP, Eoen, Nextera Energy, RWE, and Scatec to take advantage of both peaking interest rates and favorable business guidance.

ESG Approach

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions, to combine ESG factors with traditional financial analysis to make an ESG adjusted risk-return assessment, which serves as the basis for the portfolio construction. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit www.credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

ESG Overview

According to MSCI methodology. Fund performance against benchmark: MSCI World (NR).

	Portfolio	Benchmark
ESG Rating	AA	A
ESG Quality score	7.50	6.93
Environmental score	6.89	6.11
Social score	6.00	5.02
Governance score	6.14	5.77
Coverage for Rating/Scoring	99.46%	99.93%
Weighted Average Carbon Intensity (Tons of CO ₂ e/\$M sales)	423.46	98.90
Coverage for Carbon Intensity	99.11%	99.93%

Note: The total carbon intensity figure shown in this section may be higher than the total in the breakdown graph. This is because the figure is normalized, and actual weights are inflated because of limited data coverage. For further information on the MSCI methodology for the above listed ESG data points, please refer to the glossary.

⁵ CS Product Sustainability Classifications and SFDR Article are valid at the time of publishing and may be subject to change.

⁶ If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

⁷ Active Ownership is part of the fund's strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund, resp. on the Target Funds' investee companies.

Top 10 positions - ESG Characteristics

In terms of the fund's total economic exposure. Certain data points disclosed in this table are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus. Source: MSCI

Instrument Name ⁸	Weight in portfolio	GICS sector	MSCI ESG Rating	Controversy flag	Carbon intensity (tCO ₂ e / \$M sales)

No data coverage	0.30	0.06	

Note: For further information on MSCI's ESG rating methodology and the difference between categories "not ratable" and "no data coverage", please refer to the glossary.

Carbon emission intensity contribution by GICS sector

Tons of CO₂ equivalent emission intensity (GHG scopes 1 & 2) per \$m sales, by GICS sector split. Fund performance against benchmark: MSCI World (NR). Source: MSCI

	Portfolio	Benchmark	Portfolio Benchmark
Energy	137.03	14.74	
Utilities	121.32	36.13	
Industrials	120.58	9.44	
Real Estate	38.83	1.82	
Others	2.02	36.71	
Total	419.78	98.83	

Note: Security weighted data coverage is 99.11% for the portfolio. The total shown in this section may be lower than the one in the 'ESG Overview' section. This is because the figures in this breakdown are not normalized and use the actual weights. For further information on the Carbon emission intensity, please refer to the glossary.

Asset breakdown by ESG controversy flag

In % of fund total economic exposure to investee companies. Fund performance against benchmark: MSCI World (NR). Source: MSCI

	Portfolio	Benchmark	Portfolio Benchmark
Green	53.06	32.05	
Yellow	37.90	35.89	
Orange	8.50	31.91	
Red	-	0.08	
No data coverage	0.30	0.06	

Note: Exposure to investee companies represents 99.76% of portfolio weight for this share class. MSCI only provides data on ESG controversies for corporate issuers. Any remaining instruments (e.g., government bonds) are excluded from this breakdown. For further information on MSCI's ESG controversy flag methodology, please refer to the glossary.

⁸ The individual entities and/or instruments mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

Glossary

Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
Annualized Risk	Annualized risk is a statistic, which is used to measure the risk of a fund by describing the range of returns, which were achieved in the observation period are most likely to be achieved. Greater volatility implies greater risk.
Beta	A measure of the volatility, or systematic risk, of a single security or fund in comparison to the market as a whole.
Carbon emission intensity	The weighted average emissions intensity, which is provided by MSCI ESG, divides the Scopes 1 & 2 emissions in tons of CO ₂ -equivalent by million \$ sales. Intensities are broken down by GICS sector and are security weighted.
ESG aware	This product undertakes investments that explicitly assess and integrate the sustainability characteristics of companies in the investment process.
ESG benchmark	A ticked 'ESG benchmark' box reflects that the ESG section in this document compares the ESG performance of the portfolio with an ESG index. In case the box is not ticked, this means that the ESG section in this document compares the ESG performance of the portfolio with a non-ESG index or that no comparison is performed due to a lack of a recognized benchmark. The investor shall read the legal documentation of the Fund to understand how the benchmark is used. In any case, a ticked 'ESG benchmark' box does not mean that the ESG benchmark is used to attain the ESG strategy of the fund.
ESG Controversy Flag	ESG Controversy Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. Controversy flags can be red, orange, yellow or green. Red indicates that a company is involved in one or more very severe controversies. Orange indicates that a company has been involved in one or more recent severe structural controversies that are ongoing. Yellow indicates that the company is involved in severe-to-moderate level controversies. Green indicates that the company is not involved in any major controversies. For further information on the methodology, please refer to www.msci.com/esg-investing .
ESG Quality score	The ESG Quality score, based on MSCI ESG scores of underlyings, is measured on a scale from 0 (very poor) to 10 (very good). It does not correspond directly to the underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the portfolio ESG Quality score is adjusted by MSCI to reflect the industry-specific level of ESG risk exposure. As Pillar scores are absolute, and the portfolio ESG Quality score is relative, the first cannot be averaged to derive the latter. The coverage rate is security weighted.
Issuer ESG Rating	Company and Government ESG Ratings, which are provided by MSCI ESG, are measured on a scale from AAA (highest rating) to CCC (lowest rating). Company ESG Ratings are based on the issuer's exposure to industry specific ESG risks and its ability to mitigate those risks relative to peers. Company ESG Ratings are calculated on an industry relative basis while the underlying individual E, S and G Ratings are absolute. Hence, the ESG Rating cannot be seen as an average of the individual E, S and G Ratings. Government ESG Ratings identify a country's exposure to and management of ESG risk factors and explain how these factors might impact the long-term sustainability of its economy. They are derived from 0-10 scores on underlying factors in the E, S and G pillars. For further information on the MSCI methodology, please refer to www.msci.com/esg-investing .
Ex post	Refers to metrics based on historical data
GICS	Global Industry Classification Standard
Greenhouse gas (GHG) emissions	Scope 1 emissions are generated by a company directly from owned or controlled sources such as the burning of fuels (stationary or mobile), industrial processes, etc. Scope 2 emissions are indirect emissions, primarily those associated with the electricity consumed by a company. Scope 3 emissions are all other indirect emissions associated with a company's operations, such as business travel, waste generated, and products both upstream (in the supply chain) and downstream (use of the products and end of life). Scope 3 emissions typically account for the largest proportion of a company's emissions.
Information ratio	This statistic measures how much a fund's out-performance may be attributed to manager skill as oppose to market movement. A high Information Ratio infers more manager skill than a low value would suggest.
Maximum drawdown	Represents the worst possible result (in percentage terms) that occurred during the period being analyzed.
MTD	Month-to-date
MSCI	MSCI refers to the external data provider MSCI ESG Research LLC and/or its affiliates.
MSCI ESG Methodology	For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to www.msci.com/esg-investing .
NAV	Net Asset Value
Not ratable / No data coverage	Where MSCI considers an asset type for ESG analysis but data on an economic exposure is unavailable due to a lack of data from the data vendor, the investment falls under the category "No data coverage". Where MSCI considers an asset type out of scope for ESG analysis (e.g. Cash, Currency), the economic exposure falls under the category "Not ratable". For further information regarding excluded asset types, please refer to www.msci.com/esg-investing .
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the last annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.
Portfolio/Benchmark ESG Rating	Discrepancies may exist between the portfolio-level ESG Rating calculated by CSAM applying the MSCI methodology (provided in this factsheet) and the ESG Ratings displayed by other providers (e.g., MSCI ESG fund ratings). There are three main reasons for these potential deviations: (1) CSAM uses updated month-end holdings data as basis for its calculation, (2) CSAM consistently uses underlying issuer data where applicable (e.g., equity issuer in case of a convertible bond), and (3) look-through approach for target funds applied by CSAM. The coverage rate is security weighted. For further information on the MSCI methodology, please refer to www.msci.com/esg-investing .
QTD	Quarter-to-date
Sustainable Finance Disclosure Regulation (SFDR)	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector
Sustainable investment objective	Where the 'sustainable investment objective' box is ticked, this means that the product implements our investment strategies that allocate capital into companies that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG challenges. An unticked box reflects that the product does not aim to meet a sustainable investment objective.
TNA	Total Net Assets
Tracking error	Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time.
YTD	Year-to-date

Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of UBS. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.

ESG Notes

The figures contained in this section are not audited. Where ESG related information, statements and scorings are made in this document, we may have, partially or entirely, relied on publicly available information, internally developed data and/or information obtained from other third-party sources which we believe to be reliable. Our ability to verify such ESG objectives may be limited by the reliability of the data available in respect of the underlying assets and the status of the regulations in relation to tracking and providing such data. We have not independently verified any information obtained from these public and third-party sources and cannot make any representations or warranties as to its accuracy, completeness or reliability. It is possible that the data from ESG data providers may be incorrect, unavailable, or not fully updated. This is especially true where we have limited access to data from external parties regarding the underlying elements of an investment, for example due to a lack of look-through data. Such data gaps could result in an incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Investors shall not use the ESG data provided in this document for the sake of meeting their own regulatory disclosure or reporting requirements. We cannot make any guarantee about the content or completeness of such ESG disclosures, which remain subject to change and cannot be relied upon. In particular, we shall not be liable for any errors or omissions in connection with any ESG data herein, or for any direct, indirect, special, punitive, consequential or any other damages (including lost profits). In the absence of a standardized, industry-wide ESG classification system, we have developed our own ESG framework (the "CS Sustainable Investment Framework"). Therefore, investors should note that the ESG classification of the fund reflects our opinion and is based on the CS Sustainable Investment Framework which classification may vary from the classification made by third parties. The fact that a fund follows the CS Sustainable Investment Framework does not necessarily mean that it meets the investors overall investment objectives, nor their sustainability preferences. Given that sustainability regulations and guidelines are still developing, we may need to review certain ESG classifications/descriptions as industry practices change and as more regulatory guidance becomes available. The ESG-performance of a portfolio might also differ from its financial performance and we cannot make any representation as to the correlation between financial and ESG performance. Sustainability-related practices also differ by region, industry and ESG issue and are continually evolving. Consequently, sustainability-related practices may change over time. Similarly, new local sustainability requirements may result in additional compliance costs, disclosure obligations or other restrictions on the fund. Our view on the appropriate classification may also evolve over time, including in response to regulatory guidance or changes in industry approach to classification.

Nothing in this material shall be construed to impose any liability on the licensors or property right holders. Unauthorised copying of the information of the licensors or property right holders is strictly prohibited.

The full offering documentation including, the prospectus or offering memorandum, the Key Investor Information Document (KIID), the Key Information Document (KID), the fund rules, as well as the annual and bi-annual reports ("Full offering documentation"), as the case may be, may be obtained free of charge in one of the languages listed below from the legal entity/entities indicated below and where available via FundSearch (credit-suisse.com/fundsearch).

Information on your local distributors, representatives, information agent, paying agent, if any, and your local contacts in respect of the investment product(s) can be found below.

The only legally binding terms of any investment product described in this material, including risk considerations, objectives, charges and expenses are set forth in the prospectus, offering memorandum, subscription documents, fund contract and/or any other fund governing documents.

For a full description of the features of the products mentioned in this material as well as a full description of the opportunities, risks, and costs associated with the respective products, please refer to the relevant underlying securities prospectuses, sales prospectuses, or other additional product documents, which we will be pleased to provide to you at any time upon request.

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

This material may not be forwarded or distributed to any other person and may not be reproduced. Any forwarding, distribution or reproduction is unauthorized and may result in a violation of the U.S. Securities Act of 1933, as amended (the "Securities Act"). The securities referred to herein have not been, and will not be, registered under the Securities Act, or the securities laws of any states of the United States and, subject to certain exceptions, the securities may not be offered, pledged, sold or otherwise transferred within the United States or to, or for the benefit or account of, U.S. persons.

In addition, there may be conflicts of interest with regard to the investment.

In connection with the provision of services, UBS AG and/or its affiliates may pay third parties or receive from third parties, as part of their fee or otherwise, a one-time or recurring fee (e.g., issuing commissions, placement commissions or trailer fees).

Prospective investors should independently and carefully assess (with their tax, legal and financial advisers) the specific risks described in available materials, and applicable legal, regulatory, credit, tax and accounting consequences prior to making any investment decision.

The alternative investment fund manager or the (UCITS) management company, as applicable, may decide to terminate local arrangements for the marketing of the shares/units of a fund, including terminating registrations or notifications with the local supervisory authority.

A summary of investor rights for investing into European Economic Area domiciled investment funds managed or sponsored by Credit Suisse Asset Management can be obtained in English via www.credit-suisse.com/am/regulatory-information, local laws relating to investor rights may apply.

Important note regarding ESG

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on our own assumptions and interpretation of ESG at the time of drafting. Our views on ESG may evolve over time and are subject to change.

The impacts of sustainability risks are likely to develop over time and new sustainability risks may be identified as further data and information regarding sustainability factors and impacts become available and the regulatory environment regarding sustainable finance evolves. These developments may entail the risk of reclassification under the CS Sustainable Investment Framework.

Where a sustainability assessment is identified as including elements which track Environmental, Social or Governance (ESG) objectives, we are, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources may be limited in terms of correctness, accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. We have not sought to independently verify information obtained from public and third-party sources and make no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, we are not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g., lack of available data.

An ESG assessment reflects the opinion of the assessing party (we or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company/product can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Unless this has been explicitly communicated in the product or service documentation, no representation is given as to whether the product or service meets any specific regulatory framework or our own criteria for internal sustainability frameworks.

The non-financial / ESG-performance is independent of the financial performance of the portfolio or the product. The performances depend on various factors and may differ significantly. Inclusion of ESG factors in investment strategy does not guarantee a positive sustainability impact or does not necessarily result in successfully identifying and mitigating all material sustainability risks.

The Product Sustainability classification of products and services in this document reflects our opinion based on the CS Sustainable Investment Framework.

In the absence of standardized, industry-wide ESG classification system, we have developed our own ESG framework. Therefore, our Product Sustainability Classification can vary from classification made by third-parties. Given the nascent nature of ESG /sustainability regulation and guidelines, we may need to review the representation that is made in this document regarding the Product Sustainability classifications/descriptions in response to evolving statutory, regulatory or internal guidance or changes in industry approach to classification. This is true for Product Sustainability classification/description made by us and third-parties. As such, any Product Sustainability classification/description referenced in this document is therefore subject to change.

The impacts of sustainability risks are likely to develop over time and new sustainability risks may be identified as further data and information regarding sustainability factors and impacts become available and the regulatory environment regarding sustainable finance evolves. These developments may result in a potential reclassification of products/services under the CS Sustainable Investment Framework.

In addition, due to the evolving nature of regulations, references to relevant regulations such as SFDR, may need to be reviewed in the future and are subject to change.

In assessing a particular investment, the funds and their Manager may be dependent upon information and data obtained through third parties that may be incomplete, inaccurate or unavailable. This applies in particular for certain investments for which we may only have limited access to data from external parties in respect of the underlying constituents of an investment, due to, e.g., absence of look-through data. In such cases, the fund's manager will attempt to assess such information on a best-effort basis. Such data gaps could result in the incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Sustainability-related practices differ by region, industry and issue which evolve accordingly. An investment's sustainability-related practices or the assessment of such practices by the fund managers may change over time. Similarly, new sustainability requirements imposed by jurisdictions in which the fund manager does business and/or in which the funds are marketed may result in additional compliance costs, disclosure obligations or other implications or restrictions on the fund or on their managers. Under such requirements, the fund managers may be required to classify themselves or the funds against certain criteria, some of which can be open to subjective interpretation. The funds managers' and/or our views on the appropriate classification may develop over time, including in response to statutory or regulatory guidance or changes in industry approach to classification, and this may include making a change to the classification of the fund. Such change to the relevant classification may require further actions to be taken, for example it may require further disclosures by the funds' manager or the funds or it may require new processes to be set up to capture data about the funds or their investments, which may lead to additional cost.

In addition, under Regulation (EU) 2020/852 (the "Taxonomy Regulation") a financial product qualifying as Article 8(1) under SFDR that promotes environmental characteristics must make additional disclosures as of 1 January 2022 on such environmental characteristics and a description of how and to what extent its investments are in economic activities that qualify as environmentally sustainable under Article 3 of the Taxonomy Regulation. However, given the lack of available data, we may not be in the position to take into account the EU Taxonomy alignment of investments in the investment decision process. Accordingly, there might be investments underlying these financial products that may not take into account the EU criteria for environmentally sustainable economic activities. We will keep the situation under continuous review.
